Dear team

Please could I support this neighbourhood plan please?

I would particularly highlight

Less through traffic and pollution - the Warwick Way and Wilton Road area is heavily polluted despite shops and a significant residential population. The amount of through traffic should be significantly reduced - it is used as a rat run as just outside the C charge zone.

No none resident parking on single yellows on the weekend. This encourages driving to the area despite the excellent public transport and narrows the road increasing driving challenges and therefore pollution. It should be residents only on busy roads like Wilton Road and Warwick Way.

More work on improving the public realm. This should include tackling homelessness, begging and the street population

More affordable family housing so people can stay here when they have children

Have loos back at Tachbrook Market and tables and seating so people can eat out there

Best wishes Charlotte
